

THE NEW

AC line

One more step
to the future

 **bierrebi**
italian cutting technologies

The new **AC line** represents the most innovative and advanced machines, for the highest capacity and productivity in tubular knit fabric cutting

- ✔ New technology "Industry 4.0" geared for remote assistance
- ✔ Preventive maintenance to always work in optimal conditions
- ✔ Advanced feeding system with flexible parameters for the most effective feeding of different fabric types
- ✔ Enhanced fabric feeding management
- ✔ Increased cut precision
- ✔ Cutting-edge user-friendly software
- ✔ Only one unskilled operator to guarantee labor and cost optimization
- ✔ Thousands of cut pieces per hour
- ✔ Overall improved level of quality, productivity and savings

Innovation by Italian engineering at its best...

- ✓ Advanced and innovative optional: **Cutting Monitoring System (bierrebi CMS)** developed to increase production efficiency and effectiveness
- ✓ Enhanced to keep track of the production activities and monitor issues and alarms
- ✓ Information grouped and divided by day, operator, turn, lot and cutting die
- ✓ Data collection, data management and report generation
- ✓ Daily production trends and the all historical data
- ✓ Many reporting options available (activities, efficiency, planned stop, lot efficiency)
- ✓ Precise monitoring, setting and timing of daily targets
